If you get this message
Right click on installer and select "open"

Windows

Freename DNS Installer Windows

Install Application

STEP 3

Activate DNS and browse

Run Application

Select your DNS Preferences

Use your Native DNS

Use Freename DNS power by NOTO

Select "Use Freename DNS"

This will set up new DNS addresses on your computer
To go back to original settings, just select "Use your Native DNS"

<http://web3.domain>

To browse Web3 Domains

You will always need to put "http://" before the domain otherwise it will not resolve
